IN EDUCATION
MONTH**

Stop messing with our kids.

It ends here!

The answer is you.

- We advocate for the **natural rights of parents to speak for their children, helping parents** stand against those stealing their rights.
- We are united to restore parent involvement in **creating policy at the school board.**
- We support the proper role of K-12 education teaching academic curricula, and core skills, preparing students for productive success in life.

State and Federal Intrusion

PRE supports local control of school boards and their power to make decisions reflecting community values. Legislative takeover of decision making is wrong.

Comprehensive Sexuality Education

Parents' Rights In Education (PRE) is concerned about the disproportionate focus on sexual relations in public schools, beginning in kindergarten. Because CSE is often medically inaccurate and unsafe, it must be an elective course. Inspired by Planned Parenthood to change traditional sexual and gender norms of society, controversial behaviors are promoted to minors, including details of anal and oral sex, mutual masturbation, and sexuality lifestyle "options." PRE opposes the encouragement of experimentation with all choices before committing to one.

Bullying and Alternative Lifestyles

PRE defends all students. They should be required to respect one another, and bullying toward anyone should not be tolerated. We take a strong stand for tolerance, inclusivity, and equality for all students in the public schools. Students, parents, and teachers report inequities in these areas. Unfortunately, the extreme focus on LGBTQ initiatives has created unintended backlash, as many students are marginalized and threatened for holding their personal viewpoints.

Medical Sex Change for Minors

PRE opposes sex change transitioning for minors, the new popular "thing," now promoted in schools beginning in Kindergarten. Controversial and risky medical treatments/procedures, are suggested to minors by school staff, often without parental knowledge, or consent. Transgender ideology is not just infecting our laws, but is intruding into the lives of the most innocent among us, children, with the apparent growing support of the professional medical and education communities.

School Based Health Clinics / Medical Mandates

PRE believes in the educational role of public schools, however with the advent of SBHCs, they are now acting as social service agencies. These programs in schools undermine the relationship between children and families. State statutes allow SBHCs to have unprecedented access to students for services (including abortion and vaccines) provided or referred without parental knowledge or consent. Shaming students for their medical choices is child abuse.

Illegal "School Climate" Surveys

PRE opposes surveys collecting personal data from students to assess physical, mental, emotional, and social factors, including GLSEN inspired "school climate." **US Title 20 Code: Limits on Survey, Analysis, or Evaluations**, states 'No student shall be required, as part of any applicable program, to submit to a survey, analysis, or evaluation that reveals certain information.' Surveys are illegal without prior written consent of the parent.

Viewpoint Discrimination

PRE supports successful court cases in favor of student rights. Students are frequently discriminated against for their beliefs. They have legally defensible free speech rights to have a personal opinion, even though others may be offended.

National Education Association

PRE supports the rights of parents, not the union to influence curriculum. Political bias is evident. State unions place pressure on local school boards to embrace their agenda. 2019 NEA Convention voted NO to "pursuit of increased student learning." Instead, they endorsed the right to abortion, support of Black Lives Matter, and teaching 'White Fragility' in NEA professional development.

Social Emotional Learning

SEL is latest educational fad teaching students to rely on themselves, their peers, and the progressive culture, not the truths proposed by their faith and their families. Progressive social norms become their moral authority. PRE opposes the "whole child" concept, including character and ethics education, psychological insights, and group dynamics, training children in *consequentialist* (moral relativism) moral reasoning.

Safety and Privacy

In the spring of 2016, two midlevel Obama administration bureaucrats issued a directive to all public school districts stating if transgender students were not allowed to use facilities matching their "gender identity," the school is out of compliance with Title IX sex discrimination law. In March, 2017, President Trump reversed the Obama administration's directive.

Obscenity in the Classroom

There are legal exemptions for exposing children to obscenity. Although law in all 50 states makes it a crime to display obscene materials to minors, it is now legal for a teacher to display obscene materials to minors without parental knowledge or consent. The exemption laws passed in 47 states, usually include "a bona fide school, museum or public library, or individual acting in the course of employment of such entity listed." PRE supports the repeal of these laws.

Anti-American Curriculum

PRE opposes the promotion of any anti-American, anti-capitalism, and Marxist ideology by government schools funded by citizen tax dollars. By law, public schools are to remain politically neutral/unbiased. PRE also opposes the rush by administrators, teachers, and counselors to immerse all students in anti-race theology. We are opposed to any influence by groups who organize and promote Marxism and/or radical political change within the schools.

Drag Queen Ed

PRE is opposed to "Drag Queen Ed" in public schools. Local library staff use local school GSA Clubs to promote their radical agenda to minors. Grooming is a crime, and a serious concern for law enforcement.
